PROFESSIONAL SUMMARY

I am a creative and hardworking self-starter with outstanding communication skills and a sense of ownership over the work I create. I have a tireless work ethic and never allow any circumstance to adversely affect my reaction to challenges. I am motivated and always pursue the goals I set for myself with a plan to succeed in them.

- Windows, Mac, and Linux Terminal

EXPERIENCE

Full Stack Developer Intern | Realtime Advantage LLC - Los Angeles, CA   07/2022 - Present

- Create and implement front and backend features for realtime.one, a SAAS platform focused on streamlining and consolidating workflows in the multi-billion dollar domestic real estate management space.
- Developed CI/CD process to manage codebase in staging/production environments. This process is now implemented within the company's three development teams.
- Participate in the code review and push of new features between staging and production environments on a weekly basis for all development teams.

Founder, IoT Developer | Dbwhite Technologies LLC - San Francisco, CA   09/2021 - Present

- A freelance software and hardware development company I started.
- Manage project deadlines, establish deliverables, and execute for custom software, hardware, and firmware projects involving emerging IoT technologies.
- Effectively communicate with hundreds of clients globally to develop, test, and run code in remote environments.

Full Stack Developer Intern | Ham Radio Prep - Los Angeles, CA (Remote)   09/2021 - 07/2022

- Oversaw the continuous development of hamradioprep.com and americanradioclub.com, the leading American amateur radio test prep and community sites with over one-hundred thousand registered users, generating millions in revenue to date.
- Built and deployed a react native mobile and web app implementing advanced Firebase authentication and database methods allowing users to take practice exams on mobile.
- Configured Facebook, Google, and Apple ads to use dynamic web and app user session triggers to increase ad conversion rate and streamline data acquisition and application.
- Heavily contributed to the development and launch of americanradioclub.com, a platform implementing e-learning, community forum, and blog post technologies.
- Selected and implemented a cross-platform microservices architecture for authentication, allowing my team to follow a rapid development schedule in the short and long term.

EDUCATION

University of California, Los Angeles (UCLA), Los Angeles CA   EXPECTED 06/2024

Bachelor of Science: Computer Science

OTHER NOTABLE INFORMATION

- I learned to speak Mandarin while living in Taiwan.
- A project I worked on was featured in the *New York Times* and *Vogue*, this project and others can be found on my website.
